

Energy Services

LG Energy Group

LG Energy Group is a Genmed partner providing energy and net zero solutions.

LGE provide a large range of energy services and offer access to the industry's most respected professionals.

LGE combines energy procurement, data, analytics, legislative expertise and net zero support into a single solution.

Providing services into both the public and private sectors, LGE provides bespoke solutions to meet your requirements.

The Genmed & LGE advantage...

Providing comprehensive energy support to manage risk, reduce costs and save time.

total coverage

All of your energy procurement, legislative and sustainability needs from one provider, a dedicated Account Manager and a unified professional team.

release value

Everything LGE does supports customers in the wider context of their environment. Like Genmed, LGE has invested significantly in innovation to bring added value to partners.

eliminate risk

Effective risk management allows customers to take advantage of market volatility to reduce costs. This provides professional management of key energy processes and activities with benefit from scale.

Our Services...

Energy Procurement

LGE's risk managed energy procurement can protect your organisation from volatility and deliver the following results:

- A defensible and robust energy procurement risk management strategy
- Reduction of administrative burden - LGE will source a single group contract
- Price optimisation via flexible procurement
- Improved performance against budget
- Access to vast outsourced resource and expertise

Legislative Compliance

LGE's consultancy team are highly skilled and experienced, having delivered services across various organisations and countries, focusing on energy reduction, legalities compliance and corporate social responsibility. The team can deliver a whole range of comprehensive management services, as well as one off bespoke consultancy projects.

Net Zero

LGE can help you meet all your carbon and energy reduction targets and will create a tailored roadmap to assist you on this journey. LGE will work with you to create a bespoke plan, taking into account business needs, sustainability aspirations and where you are now. LGE will provide your organisation with the support, toolkit and oversight to get your organisation net zero ready in a sustainable, sensible and measurable way.

Bureau Services

Through our experience and research, we've found that utilities invoicing has an inaccuracy margin of 3-5%. Using a custom system that processes 28 separate checks on invoices at the point of upload, our bureau analysts can effectively search the data for anomalies, mistakes and opportunities to reduce your costs. LGE can also look to recoup costs from the past six years of invoices.
